High technology Song

We've got pen drives in our schoolbags,
An electronic whiteboard on the wall.
We've got laptops,
headphones and MP3s.
Hear the future call!

Now we text on mobiles,
We use high technology.
We communicate by internet
And watch films on DVD.

We take photos with our phones,
We watch videos on the screen.
We use programs for a dictionary
To find out what words mean.

Some just play computer games
Or watch the television.
They don't use their imagination
Or think or speak or listen.

We don't need pens or paper –
The keyboard does it all!
There are robots in our factories.
Hear the future call!
